

TECHNICAL SPECIFICATION

Product Name	Venison Boneless Flank & Trim				
Legal Description	Venison Boneless Flank & Trim Frozen				
Document number	3.2a9b				
Country of origin	UK				
Piece Size/Weight	n/a	Pack Size	5.0kg	Case Weight	20kg

The boneless flank is removed (sheet cut) from the carcass. Excess fat is removed. When the carcass is further processed, any "B grade" boneless trim generated during production of primal or secondary cuts is also added. Excess fat and gristle is removed, product is 85>90% visual lean. The mixed product is then bagged and weighed. The sealed bags are labelled and placed in a cardboard outer case. The case is labelled and palletised. The product is stored frozen (-18>-25°C) until despatch.

Product Description

General Description	
All wild game is shot by licensed hunters or parties accompanied by licensed hunters. A list of registered hunters is retained by the company. Shot game is stored in chilled larders or delivered, over short distances, by shoot vehicles. Ben Rigby Game operate a fleet of refrigerated vehicles that collect game from our supplier's chillers and return it to our FSA approved, BRC certified plant for processing. All our game is hunted in the wild and whilst every effort is made, please be aware that this product may contain shot and or bone fragment.	
Ingredient List	
Venison	
Product Photographs	
Packed	Removed from Pack
	
Organoleptic Testing	
Flavour	Rich, gamey flavour
Aroma	Meaty, fresh, no rancid odour
Texture	Medium grain.

Product Processing

Process description
<p>The boneless flank is removed (sheet cut) from the carcass. Excess fat is removed. When the carcass is further processed, any "B grade" boneless trim generated during production of primal or secondary cuts is also added. Excess fat and gristle is removed, product is 85>90% visual lean. The mixed product is then bagged and weighed. The sealed bags are labelled and placed in a cardboard outer case. The case is labelled and palletised.</p> <p>The product is stored frozen (-18>-25°C) until despatch.</p> <p>Delivery will be carried out by an approved 3rd party courier.</p>

Microbiological

Note: As there are no legal microbiological standards for raw game meat, microbiological testing of finished product is not routinely carried out. The following specifications are used as a guide only as it is recognised that wild game may exceed these targets.

Microbiological Specifications - Venison & Game			
Test	Target (cfu/g)	Tolerance	Unacceptable
Enterobacteriaceae	<1 x 10 ⁴	>1 x 10 ⁵	>1 x 10 ⁷
E Coli	<10	>50	>500
Salmonella	Not detected	Not Detected	Detected
Staphylococci	<20	>100	>1 x 10 ³
Pseudomonas	<1 x 10 ⁴	>1 x 10 ⁵	>1 x 10 ⁶

Microbiological Specifications - Wild Birds
