

Marketplace Frequently Asked Questions (FAQ)

How can I list my own products or equipment?

To list your products or equipment on Meatex, start by creating an account on our website. Once registered, go to the **Meatex Marketplace** section and follow the step-by-step instructions on submitting your listing. After submission, our team reviews each listing to ensure it meets quality and relevance standards before it goes live on the marketplace.

For more details, visit our guide on how it works: [Sell Your Products on Meatex](#).

Is there a cost to list products on Meatex Marketplace?

There is no upfront cost to list products on Meatex. We operate on a commission basis, charging only a 3% commission (plus VAT) on the invoice value once your product is sold. This approach ensures that you only pay when your listing results in a successful sale.

What about transport?

All marketplace products are listed on an ex-store basis unless otherwise specified. This means products are available for collection at the storage location. However, we can arrange transportation at cost if required, providing added flexibility for your delivery needs. For more details on transportation options, please refer to individual listings or contact our team.

What regions do you serve?

While Meatex operates globally, our primary focus is on the UK, Ireland, and Europe, where we connect buyers and sellers across multiple countries. Our marketplace supports international trading, although product availability may vary depending on the region. If you're outside these core areas, please check specific listings or contact our team to confirm availability for your region.
