<b>Process Outline</b>	Raw materials are combined, mixed and formed into cakes. The product is deposited onto the conveyor belt manually to be enrobed and transferred automatically to the pre-dust and batter application line. The coated product is passed through the fryer to flash fry and set the batter. After frying the product is placed on cooling racks before being transferred to the blast freezer. Once frozen the product is transferred to the packing line where it is de-racked and manually packed into bags / cartons. Cartons are then passed through the metal detector. A label is applied to the outer case listing ingredients, allergens, expiry and production dates. Placed in cold storage at -18°C ready to be dispatched.
